

Patient Guide to SwiftFlex

About SwiftFlex

Perfecting Smiles, Swiftly Shaping Futures.

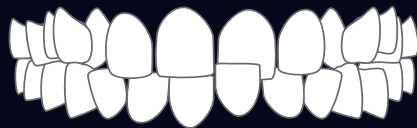

At SwiftFlex, your smile is our priority. We believe everyone deserves a beautiful smile without sacrificing comfort or confidence. Our virtually invisible, custom-made aligners discreetly straighten your teeth, allowing you to maintain your lifestyle. Enjoy the freedom to eat, drink, and maintain oral hygiene with ease, knowing our aligners blend seamlessly with your natural teeth.

We prioritise care and focus on making you smile every day. Our advanced technology ensures smooth and efficient treatment, while innovative materials minimise discomfort. Achieve the smile you desire quickly and comfortably with SwiftFlex.

Treatable cases

SwiftFlex Aligners can be used to treat a wide range of orthodontic issues, including:

Crossbite
Upper teeth fit inside lower teeth

Crowded Teeth
Too little room for teeth

Gap Teeth
Too much room for teeth

Open Bite
Gap between teeth when biting down

Overbite
Front teeth stick out

Underbite
Lower jaw sticks out forward

Crooked Teeth
Teeth are crooked or misaligned

Benefits of SwiftFlex

Discreet Appearance

Virtually invisible for a natural smile and enhanced confidence.

Convenient Appointments

Streamlined process for quick, hassle-free visits.

Removable Aligners

Freedom to eat, drink, and maintain oral hygiene easily.

Improved Oral Hygiene

Simple brushing and flossing without aligner restrictions.

Comfort for Active Lifestyles

Designed for comfort without irritation from brackets.

Reduced Pain, High Accuracy

Lower insertion forces and precise materials for comfort and accuracy.

Leading Accuracy

Expertly crafted treatment plans for fewer adjustments and faster results.

How Does SwiftFlex Work?

What to expect

① Initial Assessment

Your SwiftFlex-trained dentist will take photos, X-rays and digital scans to create your treatment plan. The more information we can gather, the better we can create your treatment plan.

② Customised Treatment Plan

SwiftFlex uses these records to develop a customised 3D treatment plan, showing your expected results and treatment duration.

③ Production of Aligners

Custom aligners are produced and sent to your dentist.

④ Receiving Aligners

The dentist will decide how many aligners you will receive at a time. You will wear each set daily and change to a new set every 1-2 weeks.

⑤ Regular Check-ups

Your dentist will advise on the schedule and determine regular visits to monitor your progress and provide new aligners.

⑥ Post-Treatment Care

After treatment, retainers may be needed to maintain your new smile. Your retainer will also be supplied in this package.

What's included

Clear Aligners

Custom-made, virtually invisible aligners to gently shift your teeth.

Aligner Case

A secure case for safe, hygienic storage.

Chewies

Bite on to the chewies to help insert the aligners into place.

Patient Aligner File

Smooths aligner edges for added comfort.

Retainers

Custom-made to maintain your new smile.

Aftercare Instructions

Clear guidelines for aligner care.

Refinements

Two opportunities to perfect your smile, at no extra cost.

Before

After

I have just completed my treatment with SwiftFlex, I am so happy with how the results turned out.

I was so unhappy with myself due to how my teeth looked, I did not like smiling or having my picture taken. I recently heard about SwiftFlex and with my wedding being 9 months away at the time I really needed something quick and effective. SwiftFlex has helped me get my confidence back. I cant wait for my wedding pictures, 1 month to go!

Natalie Murphy, 31, Reading

FAQs

What are clear aligners?

Clear aligners are transparent, custom-made plastic trays designed to straighten teeth without traditional metal braces.

How do clear aligners work?

Aligners gradually shift teeth into their desired position by applying gentle, consistent pressure. They are replaced every 1-2 weeks with a new set to continue the process.

How long does the treatment take?

Treatment duration typically ranges from 6 to 18 months, depending on individual cases.

Are clear aligners noticeable?

Aligners are virtually invisible, making them a discreet option for teeth straightening.

Can I eat and drink with my aligners on?

No, aligners should be removed before eating or drinking anything other than water to prevent staining and damage.

How do I clean my aligners?

Clean aligners with a soft toothbrush and mild soap or a recommended cleaning solution. Avoid using toothpaste, which can be abrasive.

Will I need to wear a retainer after treatment?

Yes, wearing a retainer post-treatment is crucial to maintain the new position of your teeth and prevent them from shifting back.

Are aligners painful?

Aligners are generally more comfortable than traditional braces, though some initial discomfort may occur when starting a new set. SwiftFlex's material selection significantly reduces this discomfort, ensuring a more comfortable treatment experience.
